

Chikara[®]

The responsible way to spray

Why should I use Chikara?

Controls weeds for up to 5 months

- residual action

Flexible application

- apply Chikara on its own before weeds germinate, or if foliage is present, mix it with Glyphosate

Reduced risk to wildlife

- presents a negligible risk to birds, mammals, fish, aquatic invertebrates and bees

Low dose rate

- only 37.5 grams of active ingredient per hectare

Controls a wide range of weeds

- highly effective control of annual and perennial broad-leaved weeds, as well as grasses.

Where can I use Chikara?

Chikara can be used on natural surfaces not intended to bear vegetation, permeable surfaces overlying soil and railway ballast. Do not use Chikara on non-porous man-made surfaces e.g. paved areas, concrete or tarmac.

Industrial areas

Gravelled areas

Sub-stations

Off-track rail

Fence lines

How does Chikara work?

Chikara controls a wide range of annual and perennial broad-leaved weeds, as well as grasses, prior to emergence.

To control emerged weeds, Chikara can be mixed with Glyphosate and applied when the plant is actively growing.

The active ingredient Flazasulfuron has both soil and foliar activity and works by stopping cell division and growth of the plant.

How do I apply Chikara?

Chikara is a water dispersible granule, applied using a knapsack applicator.

Refer to the product label for specific information on spray quality and nozzle requirements.

Take care not to allow spray to drift onto adjacent watercourses, onto the foliage or close to the roots of any desirable ornamental plants, trees, hedges or lawned areas.

Do not allow spray from knapsack sprayers to fall within 1m of the top of the bank of any static or flowing water body.

Weeds	Chikara /ha	360 g/l Glyphosate Product rate [†]	Chikara in 20 litres water (400 litres water/ha)*	Glyphosate in 20 litres water (400 litres water/ha)
Annual grasses and broad-leaved weeds	150 grams	3 litres	7.5 grams	150ml
Perennials	150 grams	5 litres	7.5 grams	250ml
Difficult species, e.g. Ivy, Rhododendron & Marestalk	150 grams	6 litres	7.5 grams	300ml

[†]For full information regarding compatible 360 g/l Glyphosate products, always read the product label.

*For full application rates and water volumes, always read the product label. When applied at 400 litres/ha a 20 Litre knapsack will treat 500sq metres.
